

## Clear Grease Guns

### *Simple Solution Eliminates Cross-Contamination*

It can and does happen – the wrong grease is applied to a piece of equipment – and the resulting problems can be expensive and time-consuming to correct. In fact, it has been estimated that 60 to 80 percent of bearing failures are caused by cross-contamination. LE offers Clear Grease Guns as a simple, cost-effective solution for eliminating cross-contamination.

Much more than just another grease gun, the Clear Grease Gun is a reliability tool enabling industrial operations worldwide to eliminate mistakes. It is a perfect addition to existing reliability efforts, playing a role in elevating lubrication standards, increasing accountability and raising overall safety awareness.

### **Beneficial Qualities**

- **Allow 100% visual identification**
- **Eliminate cross-contamination**
- **Enhance existing reliability programs**

### **Clearly Reliable**

- Tubes are made of high-impact, fracture-resistant polycarbonate, capable of withstanding heavy use and high temperatures.
- Tubes fit many standard grease guns, making upgrades of existing guns easy and cost-effective.
- Collars are constructed of durable T6061 aircraft aluminum and will not rust.
- Collars are anodized and available in a variety of colors, perfect for when a secondary method of identification is required, such as lubricant type, application or department.
- Guns available in pistol grip and lever styles.
- Approved for use by all branches of the U.S. Military; NSNs are available.
